1 What this system is for

The Service Vehicle Request (SVR) system is how staff of the DAR Provincial Office in Marinduque ask to use an office vehicle for official travel.

Instead of paper slips, you fill out a short online form. An administrator reviews it, assigns a vehicle, and approves it. You can then print the official request form, and everyone can see which vehicles are already booked on a given day.

- **Regular users** can create requests, follow their status, and view the shared calendar.

- **Administrators** can do all of that **plus** assign vehicles, approve or reject requests, and manage the office records.

2 Signing in & your account

Open svr-booking-dar.vercel.app in any web browser, or use the mobile app (see section 9).

If you already have an account

- 1 Tap **Sign in**.
- 2 Enter your **email** and **password**.
- 3 Tap **Sign in** again — you'll land on your dashboard.

If you're new

- 1 Tap **Sign up** on the welcome screen.
- 2 Enter your name, work email, and a password you'll remember.
- 3 Check your email for a verification link and open it to activate your account.

FORGOT YOUR PASSWORD?

On the sign-in screen choose **Forgot password**, enter your email, and follow the reset link we send you. Your old password stops working once you set a new one.

3 Reading the dashboard

The dashboard is your home screen. From the menu on the left you can reach **Dashboard**, **Bookings**, **Calendar**, and **New Request**.

At the top are four count cards — **Pending**, **Approved**, **Rejected**, and **Cancelled** — followed by a chart of the year and a table of recent bookings.

GOOD TO KNOW

The dashboard shows **all** bookings in the office, not only your own, so you can see the whole picture. Only administrators see the Edit, Cancel, and Delete buttons — for everyone else it's view-only.

4 Requesting a vehicle

Choose **New Request** from the menu, then work down the form.

- 1 **Pick the trip date** on the calendar. Grey past dates can't be chosen.
- 2 **Choose a start time.** Times already taken show **(booked)** and can't be picked — choose a free one.
- 3 **Enter the requestor's name** — the person the vehicle is for.
- 4 **Type the destination** and the **purpose of travel**.
- 5 **Add passengers**, one name per line (optional).
- 6 Tap **Submit request**. You'll get a **control number** — write it down or take a screenshot.

WHAT HAPPENS NEXT

Your request starts as **Pending**. An administrator assigns a vehicle and either approves or rejects it. You don't pick the vehicle yourself — that's done during approval.

5 What the statuses mean

Every request carries one status, shown as a coloured label:

- Pending** Submitted and waiting for an administrator to review and assign a vehicle.
- Approved** A vehicle is assigned and the trip is confirmed. You can print the form.
- Rejected** The request was declined. Submit a new one if plans change.
- Cancelled** The booking was called off by an administrator.

You can filter the Bookings list by status, search by control number or destination, sort the list, and choose how many rows to show per page.

6 The booking calendar

Choose **Calendar** to see, at a glance, which vehicles are busy. Pick a **vehicle** (or leave it on **All vehicles**) and a **month**.

Reading a day

- **All vehicles:** a day shows how many bookings it has, e.g. **3 booked**.
- **One vehicle:** a day shows a number like **1/48**. The day is split into 48 half-hour start times; **1/48** means one of them is taken.
- Colours: **green** means open, **amber** means partly booked, **red** means fully booked.

Tap any day to see the exact times booked, along with the vehicle and control number for each.

7 Viewing & printing a form

From the dashboard or Bookings list, tap any row to open its official **Request of Vehicle** form. Then tap **Print / Save as PDF**.

The sheet is sized for long bond (Folio, 8.5×13 in) and prints **two copies per page** with a cut line between them.

BEFORE YOU PRINT

In the print window, turn **off** "Headers and footers" so the date and web address don't appear on the paper.

8 Your profile & password

Choose **Profile** to update your details.

- Change your **display name** and **profile photo**.
- Change your **password** at any time.
- Change your **email** — you'll verify the new address before it takes effect.

9 Getting the mobile app

An Android app is available. It opens the same system in a full-screen window.

↓ Download the Android app (v1.5)

- 1 Open that link on your Android phone.
- 2 When it finishes downloading, tap the file to install.
- 3 If asked, allow installing from **unknown sources** — this is normal for apps outside the Play Store.

10 For administrators

Administrators see extra menu items: **Approvals**, **Vehicles**, **Signatories**, and **Activity History**.

Approving a request

- 1 Open **Approvals** to see all pending requests.
- 2 Assign a **vehicle** to the request.
- 3 Choose **Approve** or **Reject**.

Editing, cancelling, deleting

On any booking row, administrators can **Edit** details, **Cancel** it, or **Delete** it. These actions are admin-only.

Control numbers

Each booking gets a control number automatically. It looks like this:

2026_{YEAR} — **07**_{MONTH} — **0229**_{NUMBER} **A**_{LETTER}

The letter cycles A, B, C ... Z and back to A with each new booking. When entering an old paper record, an administrator can type the control number by hand instead — including on the printed form itself.

Past bookings

Administrators may pick **past dates** to record trips that already happened. Regular users can only book today or later.

Managing the office records

- **Vehicles** — add, rename, or retire vehicles.
- **Signatories** — set the names, positions, and signature images printed on the form.
- **Activity History** — a running log of who created, approved, rejected, or cancelled each booking, and when.

11 Common questions

Can two trips share the same vehicle and time?

The form won't let you pick a time that's already booked, to avoid mistakes. If a genuine shared trip is needed, an administrator can arrange it.

Why can't I choose a vehicle when requesting?

By design — the administrator assigns the vehicle when approving, based on what's available.

I can see other people's bookings. Is that right?

Yes. Everyone can view all bookings so the office schedule is transparent. Only administrators can change them.

What time zone are the dates and times?

Everything is shown in **Manila time (Asia/Manila)**.
